ABOUT US:

ML ARCHITETTURA is the new company created by **Architect Marco Claudi**.

A Natural Evolution of **MILANO LAYOUT** the architectural firm which was founded by him and boasts over 25 years of experience

In recent years the design of the spaces in which we live and work has completely changed under the influence of three main factors: new design tools, an increasingly dynamic market and international entrepreneurs looking for the best results in the shortest time possible.

In order to respond to these new requests **ML ARCHITETTURA** was born: a team of Architects of absolute value supported by carefully selected external consultants and equipped with modern state of the art techniques and tools to address the important challenges of the sector has played a major role in keeping intact the original mission which has brought success to **MILANO LAYOUT**: Designing the highest quality, combining research and innovation with concrete professionalism.

The Headquarters are a large loft immersed in greenery overlooking the canals of **Navigli**, the creative heart of the Milan that has never ceased to produce value.

A renovated open space to live where we can compete without barriers and grow together, project after project.

Here is where we have been working for years for major national and international clients and from these technologically renovated spaces and with a new form of professional aggregation we will continue to study the projects of our clients with undiminished passion.
